INDEX TO VOLUME 138

Alphabetical Table of Contents of Authors

ÅGREN, GÖRAN I. See ERNESTO BOSATTA

AKÇAKAYA, H. REŞIT. See ROGER ARDITI

ALTENBERG, LEE. Chaos from linear frequency-dependent selection, 51

ARDITI, ROGER, LEV R. GINZBURG, and H. REŞIT AKÇAKAYA. Variation in plankton densities among lakes: a case for ratio-dependent predation models, 1287

ARTER, HUBERT E. See MONTGOMERY SLATKIN

———. See MONTGOMERY SLATKIN

BAIRD, RONALD C. See GEORGE Y. JUMPER, JR.

BAUGHMAN, JOHN F. Do protandrous males have increased mating success? the case of *Euphydryas editha*, 536

BEAUCHAMP, G. See S. B. DATTA

BENSCH, STAFFAN, and DENNIS HASSELQUIST. Nest predation lowers the polygyny threshold: a new compensation model, 1297

BENSON, B. J. See T. K. KRATZ

BLOOD, E. R. See T. K. KRATZ

BLOUIN, MICHAEL S., and MICHAEL L. G. LOEB. Effects of environmentally induced development-rate variation on head and limb morphology in the green tree frog, *Hyla cinerea*, 717

BOECKLEN, WILLIAM. See DANIEL SIMBERLOFF

BOND, W. J. See R. I. YEATON

BOSATTA, ERNESTO, and GÖRAN I. ÅGREN. Dynamics of carbon and nitrogen in the organic matter of the soil: a generic theory, 227

BREMER, B. See O. ERIKSSON

BROWN, JAMES H., and PAUL F. NICOLETTO. Spatial scaling of species composition: body masses of North American land mammals, 1478

BROYLES, STEVEN B., and ROBERT WYATT. Effective pollen dispersal in a natural population of *Asclepias exaltata:* the influence of pollinator behavior, genetic similarity, and mating success, 1239

CALDERONE, NICHOLAS W., and ROBERT E. PAGE, JR. Evolutionary genetics of division of labor in colonies of the honey bee (*Apis mellifera*), 69

CALEY, M. JULIAN. A null model for testing distributions of dispersal distances, 524

CARRASCAL, L. M., and J. L. TELLERÍA. Bird size and density: a regional approach, 777

CHAI, PENG. See JAMES H. MARDEN

CHAVELAS, CECILIA GARCÍA. See HUGH DRUMMOND

CHESSON, P. L. See M. P. HASSELL

CHEW, F. S., and S. P. COURTNEY. Plant apparency and evolutionary escape from insect herbivory, 729

CHRISTIANSEN, FREDDY BUGGE. On conditions for evolutionary stability for a continuously varying character, 37

CLIFTON, LISA M. See ERIC T. SCHULTZ

COHEN, JOEL E., and CHARLES M. NEWMAN. Community area and food-chain length: theoretical predictions, 1542

COMBES, CLAUDE. Ethological aspects of parasite transmission, 866

COURTNEY, S. P. See F. S. CHEW

CRESSWELL, JAMES E., and CANDACE GALEN. Frequency-dependent selection and adaptive surfaces for floral character combinations: the pollination of *Polemonium viscosum*, 1342

CUNNINGHAM, G. L. See T. K. KRATZ

CURTSINGER, JAMES W. Sperm competition and the evolution of multiple mating, 93

CUSHMAN, J. HALL, and THOMAS G. WHITHAM. Competition mediating the outcome of a mutualism: protective services of ants as a limiting resource for membracids, 851

DAHLGREN, R. A. See T. K. KRATZ
DANCIK, BRUCE P. See DAVID B. WAGNER
DANIELSON, BRENT J. Communities in a landscape: the influence of habitat heterogeneity on the interactions between species, 1105
DATTA, S. B., and G. BEAUCHAMP. Effects of group demography on dominance relationships among female primates. I. Mother-daughter and sister-sister relations, 201
DENNO, ROBERT F., GEORGE K. RODERICK, KAREN L. OLMSTEAD, and HARTMUT G. DÖBEL. Density-related migration in planthoppers (Homoptera: Delphacidae): the role of habitat persistence, 1513
DÖBEL, HARTMUT G. See ROBERT F. DENNO
DRUMMOND, HUGH, JOSE LUIS OSORNO, ROXANA TORRES, CECILIA GARCÍA CHAVELAS, and HORACIO MERCHANT LARIOS. Sexual size dimorphism and sibling competition: implications for avian sex ratios, 623
DUGATKIN, LEE ALAN, and DAVID SLOAN WILSON. ROVER: a strategy for exploiting cooperators in a patchy environment, 687
DUNSON, WILLIAM A., and JOSEPH TRAVIS. The role of abiotic factors in community organization, 1067
DUSSOURD, DAVID E. See BRIAN D. FARRELL

EHRLÉN, JOHAN. Why do plants produce surplus flowers? a reserve-ovary model, 918
ELGAR, MARK A. See JONATHAN A. NEWMAN
EMLEN, STEPHEN T., HUDSON K. REEVE, PAUL W. SHERMAN, PETER H. WREGE, FRANCIS L. W. RATNIEKS, and JANET SHELLMAN-REEVE. Adaptive versus nonadaptive explanations of behavior: the case of alloparental helping, 259
EMMONS, LOUISE H. Frugivory in treeshrews (*Tupaia*), 642
ERIKSSON, O., and B. BREMER. Fruit characteristics, life forms, and species richness in the plant family Rubiaceae, 751
ESHEL, ILAN, and EMILIA SANSONE. Parent-offspring conflict over the sex ratio in a diploid population with different investment in male and in female offspring, 954

FARRELL, BRIAN D., DAVID E. DUSSOURD, and CHARLES MITTER. Escalation of plant defense: do latex and resin canals spur plant diversification? 881
FLEMING, THEODORE H., and KAREN R. LIPS. Angiosperm endozoochory: were pterosaurs Cretaceous seed dispersers? 1058
FRYXELL, JOHN M. Forage quality and aggregation by large herbivores, 478

GALEN, CANDACE. See JAMES E. CRESSWELL
GETTY, THOMAS, and H. R. PULLIAM. Random prey detection with pause-travel search, 1459
GIBSON, THOMAS C. Competition among threadleaf sundews for limited insect resources, 785
GINZBURG, LEV R. See ROGER ARDITI
GODFRAY, H. C. J. See MARK D. PAGEL
GOMULKIEWICZ, RICHARD. Limited female choice and the evolution of secondary sexual characters, 1396
GOODNIGHT, CHARLES J. Intermixing ability in two species communities of *Tribolium* flour beetles, 342
GORDON, DEBORAH M. Behavioral flexibility and the foraging ecology of seed-eating ants, 379
GOTELLI, NICHOLAS J. Metapopulation models: the rescue effect, the propagule rain, and the core-satellite hypothesis, 768
GOVINDARAJU, DIDDAHALLY R. See DAVID B. WAGNER
GRAJAL, ALEJANDRO. See DOUGLAS J. LEVEY
GROVER, JAMES P. Resource competition in a variable environment: phytoplankton growing according to the variable-internal-stores model, 811

HANSKI, ILKKA. See VLADIMIR M. ZAKHAROV
HARTLEY, IAN R. See IAN P. F. OWENS
HARVELL, C. DREW. Coloniality and inducible polymorphism, 1
HARVEY, PAUL H. See MARK D. PAGEL
HASSELL, M. P., R. M. MAY, S. W. PACALA, and P. L. CHESSON. The persistence of host-parasitoid associations

in patchy environments. I. A general criterion, 568
———. See S. W. Pacala
Hasselquist, Dennis. See Staffan Bensch
Hoffmann, Ary A. Heritable variation for territorial success in field-collected *Drosophila melanogaster*, 668
Holsinger, Kent E. Mass-action models of plant mating systems: the evolutionary stability of mixed mating systems, 606
Houston, Alasdair I. A note on the results of Barkan and Withiam on simultaneous choice, 533
Hrdy, Sarah Blaffer. See Carel P. van Schaik

Jamieson, Ian. The unselected hypothesis for the evolution of helping behavior: too much or too little emphasis on natural selection? 271
Jumper, George Y., Jr., and Ronald C. Baird. Location by olfaction: a model and application to the mating problem in the deep-sea hatchetfish *Argyropelecus hemigymnus*, 1431

Kikuzawa, Kihachiro. A cost-benefit analysis of leaf habit and leaf longevity of trees and their geographical pattern, 1250
Kratz, T. K., B. J. Benson, E. R. Blood, G. L. Cunningham, and R. A. Dahlgren. The influence of landscape position on temporal variability in four North American ecosystems, 355

Lalonde, R. G. Optimal offspring provisioning when resources are not predictable, 680
Lambers, Hans. See Hendrik Poorter
Lambert, D. M. See C. S. White
Lamey, Timothy C. See Douglas W. Mock
Larios, Horacio Merchant. See Hugh Drummond
Lenski, Richard E., Michael R. Rose, Suzanne C. Simpson, and Scott C. Tadler. Long-term experimental evolution in *Escherichia coli*. I. Adaptation and divergence during 2,000 generations, 1315
Levey, Douglas J., and Alejandro Grajal. Evolutionary implications of fruit-processing limitations in cedar waxwings, 171
Ligon, J. David, and Peter B. Stacey. The origin and maintenance of helping behavior in birds, 254
Lindén, Mats. Divorce in great tits—chance or choice? an experimental approach, 1039
Lips, Karen R. See Theodore H. Fleming
Loeb, Michael L. G. See Michael S. Blouin

Marden, James H., and Peng Chai. Aerial predation and butterfly design: how palatability, mimicry, and the need for evasive flight constrain mass allocation, 15
Marks, R. William, and Hamish G. Spencer. The maintenance of single-locus polymorphism. II. The evolution of fitness and allele frequencies, 1354
Martin, Janine E. See Peter T. Raimondi
May, R. M. See M. P. Hassell
Meikle, Douglas B., and Rollin C. Richmond. Temperature and sex-specific differences in reproduction related to genotypic variation at the esterase-6 locus in *Drosophila melanogaster*, 762
Millar, C. D. See C. S. White
Miquelle, Dale G. Are moose mice? the function of scent urination in moose, 460
Mitter, Charles. See Brian D. Farrell
Mock, Douglas W., and Timothy C. Lamey. The role of brood size in regulating egret sibling aggression, 1015
Møller, Anders Pape. Why mated songbirds sing so much: mate guarding and male announcement of mate fertility status, 994
Moore, Jennifer L. See Wade B. Worthen
Morris, Douglas W. Fitness and patch selection in white-footed mice, 702

Newman, Charles M. See Joel E. Cohen
Newman, Jonathan A., and Mark A. Elgar. Sexual cannibalism in orb-weaving spiders: an economic model, 1372
Nicoletto, Paul F. See James H. Brown

O'Brien, Timothy G. See John G. Robinson
Oden, Neal L. See Robert R. Sokal

OLMSTEAD, KAREN L. See ROBERT F. DENNO
OSORNO, JOSE LUIS. See HUGH DRUMMOND
OWENS, IAN P. F., and IAN R. HARTLEY. "Trojan sparrows": evolutionary consequences of dishonest invasion for the badges-of-status model, 1187

PACALA, S. W. See M. P. HASSELL
PACALA, S. W., and M. P. HASSELL. The persistence of host-parasitoid associations in patchy environments. II. Evaluation of field data, 584
PAGE, ROBERT E., JR. See NICHOLAS W. CALDERONE
PAGEL, MARK D., PAUL H. HARVEY, and H. C. J. GODFRAY. Species-abundance, biomass, and resource-use distributions, 836
PAMILO, PEKKA. Evolution of colony characteristics in social insects. II. Number of reproductive individuals, 412
PANKAKOSKI, ERKKI. See VLADIMIR M. ZAKHAROV
PÄRT, TOMAS. Philopatry pays: a comparison between collared flycatcher sisters, 790
PELTONEN, ANU. See VLADIMIR M. ZAKHAROV
PETERS, ROBERT H. See BILL SHIPLEY
PETERSEN, CHRISTOPHER W. Sex allocation in hermaphroditic sea basses, 650
PIEROTTI, RAYMOND. Infanticide versus adoption: an intergenerational conflict, 1140
POLIS, GARY A. Complex trophic interactions in deserts: an empirical critique of food-web theory, 123
POORTER, HENDRIK, and HANS LAMBERS. Is interspecific variation in relative growth rate positively correlated with biomass allocation to the leaves? 1264
PULLIAM, H. R. See THOMAS GETTY

RAIMONDI, PETER T., and JANINE E. MARTIN. Evidence that mating group size affects allocation of reproductive resources in a simultaneous hermaphrodite, 1206
RATNIEKS, FRANCIS L. W. See STEPHEN T. EMLEN
READ, ANDREW F. Passerine polygny: a role for parasites? 434
REAGAN, NANCY L., and PAUL A. VERRELL. The evolution of plethodontid salamanders: did terrestrial mating facilitate lunglessness? 1307
REAL, LESLIE A. Search theory and mate choice. II. Mutual interaction, assortative mating, and equilibrium variation in male and female fitness, 901
REEVE, HUDSON K. See STEPHEN T. EMLEN
RICHMOND, ROLLIN C. See DOUGLAS B. MEIKLE
RISKA, BRUCE. Regression models in evolutionary allometry, 283
RITLAND, KERMIT. A genetic approach to measuring pollen discounting in natural plant populations, 1049
ROBINSON, JOHN G., and TIMOTHY G. O'BRIEN. Adjustment in birth sex ratio in wedge-capped capuchin monkeys, 1173
RODERICK, GEORGE K. See ROBERT F. DENNO
ROSE, MICHAEL R. See RICHARD E. LENSKI
ROUDEBUSH, ROGER E. See SUSAN C. WALLS
ROUGHGARDEN, JONATHAN. The evolution of sex, 934
RUTOWSKI, RONALD L. The evolution of male mate-locating behavior in butterflies, 1121

SANSONE, EMILIA. See ILAN ESHEL
SCHULTZ, ERIC T., LISA M. CLIFTON, and ROBERT R. WARNER. Energetic constraints and size-based tactics: the adaptive significance of breeding-schedule variation in a marine fish (Embiotocidae: *Micrometrus minimus*), 1408
SHEFTEL, BORIS I. See VLADIMIR M. ZAKHAROV
SHELLMAN-REEVE, JANET. See STEPHEN T. EMLEN
SHERMAN, PAUL W. See STEPHEN T. EMLEN
SHINE, RICHARD. Intersexual dietary divergence and the evolution of sexual dimorphism in snakes, 103
SHIPLEY, BILL, and ROBERT H. PETERS. The seduction by mechanism: a reply to Tilman, 1276
SIMBERLOFF, DANIEL, and WILLIAM BOECKLEN. Patterns of extinction in the introduced Hawaiian avifauna: a reexamination of the role of competition, 300

SIMPSON, SUZANNE C. See RICHARD E. LENSKI
SLATKIN, MONTGOMERY, and HUBERT E. ARTER. Reply to Sokal and Oden, 522
———. Spatial autocorrelation methods in population genetics, 499
SMITH, WINSTON PAUL. Ontogeny and adaptiveness of tail-flagging behavior in white-tailed deer, 190
SOKAL, ROBERT R., and NEAL L. ODEN. Spatial autocorrelation analysis as an inferential tool in population genetics, 518
SPENCER, HAMISH G. See R. WILLIAM MARKS
STACEY, PETER B. See J. DAVID LIGON
STEVENS, P. M. See C. S. WHITE
SUN, ZHONG-XU. See DAVID B. WAGNER

TADLER, SCOTT C. See RICHARD E. LENSKI
TEATHER, KEVIN L. See PATRICK J. WEATHERHEAD
TELLERÍA, J. L. See L. M. CARRASCAL
TILMAN, DAVID. Relative growth rates and plant allocation patterns, 1269
———. The schism between theory and ardent empiricism: a reply to Shipley and Peters, 1283
TORRES, ROXANA. See HUGH DRUMMOND
TRAVIS, JOSEPH. See WILLIAM A. DUNSON

VAN SCHAIK, CAREL P., and SARAH BLAFFER HRDY. Intensity of local resource competition shapes the relationship between maternal rank and sex ratios at birth in cercopithecine primates, 1555
VERRELL, PAUL A. See NANCY L. REAGAN

WAGNER, DAVID B., ZHONG-XU SUN, DIDDAHALLY R. GOVINDARAJU, and BRUCE P. DANCIK. Spatial patterns of chloroplast DNA and cone morphology variation within populations of a *Pinus banksiana–Pinus contorta* sympatric region, 156
WAKE, DAVID B. Homoplasy: the result of natural selection, or evidence of design limitations? 543
WALLS, SUSAN C., and ROGER E. ROUDEBUSH. Reduced aggression toward siblings as evidence of kin recognition in cannibalistic salamanders, 1027
WARNER, ROBERT R. See ERIC T. SCHULTZ
WEATHERHEAD, PATRICK J., and KEVIN L. TEATHER. Are skewed fledgling sex ratios in sexually dimorphic birds adaptive? 1159
WHEELER, DIANA E. The developmental basis of worker caste polymorphism in ants, 1218
WHITE, C. S., D. M. LAMBERT, C. D. MILLAR, and P. M. STEVENS. Is helping behavior a consequence of natural selection? 246
WHITHAM, THOMAS G. See J. HALL CUSHMAN
WILEY, R. HAVEN. Associations of song properties with habitats for territorial oscine birds of eastern North America, 973
WILSON, DAVID SLOAN. See LEE ALAN DUGATKIN
WORTHEN, WADE B., and JENNIFER L. MOORE. Higher-order interactions and indirect effects: a resolution using laboratory *Drosophila* communities, 1092
WREGE, PETER H. See STEPHEN T. EMLEN
WYATT, ROBERT. See STEVEN B. BROYLES

YEATON, R. I., and W. J. BOND. Competition between two shrub species: dispersal differences and fire promote coexistence, 328

ZAKHAROV, VLADIMIR M., ERKKI PANKAKOSKI, BORIS I. SHEFTEL, ANU PELTONEN, and ILKKA HANSKI. Developmental stability and population dynamics in the common shrew, *Sorex araneus*, 797

Alphabetical Table of Contents of Titles

Adaptive versus nonadaptive explanations of behavior: the case of alloparental helping. Stephen T. Emlen, Hudson K. Reeve, Paul W. Sherman, Peter H. Wrege, Francis L. W. Ratnieks, and Janet Shellman-Reeve, 259

Adjustment in birth sex ratio in wedge-capped capuchin monkeys. John G. Robinson and Timothy G. O'Brien, 1173
Aerial predation and butterfly design: how palatability, mimicry, and the need for evasive flight constrain mass allocation. James H. Marden and Peng Chai, 15
Angiosperm endozoochory: were pterosaurs Cretaceous seed dispersers? Theodore H. Fleming and Karen R. Lips, 1058
Are moose mice? the function of scent urination in moose. Dale G. Miquelle, 460
Are skewed fledgling sex ratios in sexually dimorphic birds adaptive? Patrick J. Weatherhead and Kevin L. Teather, 1159
Associations of song properties with habitats for territorial oscine birds of eastern North America. R. Haven Wiley, 973

Behavioral flexibility and the foraging ecology of seed-eating ants. Deborah M. Gordon, 379
Bird size and density: a regional approach. L. M. Carrascal and J. L. Tellería, 777

Chaos from linear frequency-dependent selection. Lee Altenberg, 51
Coloniality and inducible polymorphism. C. Drew Harvell, 1
Communities in a landscape: the influence of habitat heterogeneity on the interactions between species. Brent J. Danielson, 1105
Community area and food-chain length: theoretical predictions. Joel E. Cohen and Charles M. Newman, 1542
Competition among threadleaf sundews for limited insect resources. Thomas C. Gibson, 785
Competition between two shrub species: dispersal differences and fire promote coexistence. R. I. Yeaton and W. J. Bond, 328
Competition mediating the outcome of a mutualism: protective services of ants as a limiting resource for membracids. J. Hall Cushman and Thomas G. Whitham, 851
Complex trophic interactions in deserts: an empirical critique of food-web theory. Gary A. Polis, 123
A cost-benefit analysis of leaf habit and leaf longevity of trees and their geographical pattern. Kihachiro Kikuzawa, 1250

Density-related migration in planthoppers (Homoptera: Delphacidae): the role of habitat persistence. Robert F. Denno, George K. Roderick, Karen L. Olmstead, and Hartmut G. Döbel, 1513
The developmental basis of worker caste polymorphism in ants. Diana E. Wheeler, 1218
Developmental stability and population dynamics in the common shrew, *Sorex araneus*. Vladimir M. Zakharov, Erkki Pankakoski, Boris I. Sheftel, Anu Peltonen, and Ilkka Hanski, 797
Divorce in great tits—chance or choice? an experimental approach. Mats Lindén, 1039
Do protandrous males have increased mating success? the case of *Euphydryas editha*. John F. Baughman, 536
Dynamics of carbon and nitrogen in the organic matter of the soil: a generic theory. Ernesto Bosatta and Göran I. Ågren, 227

Effective pollen dispersal in a natural population of *Asclepias exaltata:* the influence of pollinator behavior, genetic similarity, and mating success. Steven B. Broyles and Robert Wyatt, 1239
Effects of environmentally induced development-rate variation on head and limb morphology in the green tree frog, *Hyla cinerea*. Michael S. Blouin and Michael L. G. Loeb, 717
Effects of group demography on dominance relationships among female primates. I. Mother-daughter and sister-sister relations. S. B. Datta and G. Beauchamp, 201
Energetic constraints and size-based tactics: the adaptive significance of breeding-schedule variation in a marine fish (Embiotocidae: *Micrometrus minimus*). Eric T. Schultz, Lisa M. Clifton, and Robert R. Warner, 1408
Escalation of plant defense: do latex and

resin canals spur plant diversification? Brian D. Farrell, David E. Dussourd, and Charles Mitter, 881
Ethological aspects of parasite transmission. Claude Combes, 866
Evidence that mating group size affects allocation of reproductive resources in a simultaneous hermaphrodite. Peter T. Raimondi and Janine E. Martin, 1206
Evolution of colony characteristics in social insects. II. Number of reproductive individuals. Pekka Pamilo, 412
The evolution of male mate-locating behavior in butterflies. Ronald L. Rutowski, 1121
The evolution of plethodontid salamanders: did terrestrial mating facilitate lunglessness? Nancy L. Reagan and Paul A. Verrell, 1307
Evolutionary genetics of division of labor in colonies of the honey bee (*Apis mellifera*). Nicholas W. Calderone and Robert E. Page, Jr., 69
Evolutionary implications of fruit-processing limitations in cedar waxwings. Douglas J. Levey and Alejandro Grajal, 171

Fitness and patch selection in white-footed mice. Douglas W. Morris, 702
Forage quality and aggregation by large herbivores. John M. Fryxell, 478
Frequency-dependent selection and adaptive surfaces for floral character combinations: the pollination of *Polemonium viscosum*. James E. Cresswell and Candace Galen, 1342
Frugivory in treeshrews (*Tupaia*). Louise H. Emmons, 642
Fruit characteristics, life forms, and species richness in the plant family Rubiaceae. O. Eriksson and B. Bremer, 751

A genetic approach to measuring pollen discounting in natural plant populations. Kermit Ritland, 1049

Heritable variation for territorial success in field-collected *Drosophila melanogaster*. Ary A. Hoffman, 668
Higher-order interactions and indirect effects: a resolution using laboratory *Drosophila* communities. Wade B. Worthen and Jennifer L. Moore, 1092
Homoplasy: the result of natural selection, or evidence of design limitations? David B. Wake, 543

Infanticide versus adoption: an intergenerational conflict. Raymond Pierotti, 1140
The influence of landscape position on temporal variability in four North American ecosystems. T. K. Kratz, B. J. Benson, E. R. Blood, G. L. Cunningham, and R. A. Dahlgren, 355
Intensity of local resource competition shapes the relationship between maternal rank and sex ratios at birth in cercopithecine primates. Carel P. van Schaik and Sarah Blaffer Hrdy, 1555
Intermixing ability in two species communities of *Tribolium* flour beetles. Charles J. Goodnight, 342
Intersexual dietary divergence and the evolution of sexual dimorphism in snakes. Richard Shine, 103
Is helping behavior a consequence of natural selection? C. S. White, D. M. Lambert, C. D. Millar, and P. M. Stevens, 246
Is interspecific variation in relative growth rate positively correlated with biomass allocation to the leaves? Hendrik Poorter and Hans Lambers, 1264

Limited female choice and the evolution of secondary sexual characters. Richard Gomulkiewicz, 1396
Location by olfaction: a model and application to the mating problem in the deep-sea hatchetfish *Argyropelecus hemigymnus*. George Y. Jumper, Jr., and Ronald C. Baird, 1431
Long-term experimental evolution in *Escherichia coli*. I. Adaptation and divergence during 2,000 generations. Richard E. Lenski, Michael R. Rose, Suzanne C. Simpson, and Scott C. Tadler, 1315

The maintenance of single-locus polymorphism. II. The evolution of fitnesses and allele frequencies. R. William Marks and Hamish G. Spencer, 1354
Mass-action models of plant mating sys-

tems: the evolutionary stability of mixed mating systems. Kent E. Holsinger, 606
Metapopulation models: the rescue effect, the propagule rain, and the core-satellite hypothesis. Nicholas J. Gotelli, 768

Nest predation lowers the polygyny threshold: a new compensation model. Staffan Bensch and Dennis Hasselquist, 1297
A note on the results of Barkan and Withiam on simultaneous choice. Alasdair I. Houston, 533
A null model for testing distributions of dispersal distances. M. Julian Caley, 524

On conditions for evolutionary stability for a continuously varying character. Freddy Bugge Christiansen, 37
Ontogeny and adaptiveness of tail-flagging behavior in white-tailed deer. Winston Paul Smith, 190
Optimal offspring provisioning when resources are not predictable. R. G. Lalonde, 680
The origin and maintenance of helping behavior in birds. J. David Ligon and Peter B. Stacey, 254

Parent-offspring conflict over the sex ratio in a diploid population with different investment in male and in female offspring. Ilan Eshel and Emilia Sansone, 954
Passerine polygyny: a role for parasites? Andrew F. Read, 434
Patterns of extinction in the introduced Hawaiian avifauna: a reexamination of the role of competition. Daniel Simberloff and William Boecklen, 300
The persistence of host-parasitoid associations in patchy environments. I. A general criterion. M. P. Hassell, R. M. May, S. W. Pacala, and P. L. Chesson, 568
The persistence of host-parasitoid associations in patchy environments. II. Evaluation of field data. S. W. Pacala and M. P. Hassell, 584
Philopatry pays: a comparison between collared flycatcher sisters. Tomas Pärt, 790

Plant apparency and evolutionary escape from insect herbivory. F. S. Chew and S. P. Courtney, 729

Random prey detection with pause-travel search. Thomas Getty and H. R. Pulliam, 1459
Reduced aggression toward siblings as evidence of kin recognition in cannibalistic salamanders. Susan C. Walls and Roger E. Roudebush, 1027
Regression models in evolutionary allometry. Bruce Riska, 283
Relative growth rates and plant allocation patterns. David Tilman, 1269
Reply to Sokal and Oden. Montgomery Slatkin and Hubert E. Arter, 522
Resource competition in a variable environment: phytoplankton growing according to the variable-internal-stores model. James P. Grover, 811
The role of abiotic factors in community organization. William A. Dunson and Joseph Travis, 1067
The role of brood size in regulating egret sibling aggression. Douglas W. Mock and Timothy C. Lamey, 1015
ROVER: a strategy for exploiting cooperators in a patchy environment. Lee Alan Dugatkin and David Sloan Wilson, 687

The schism between theory and ardent empiricism: a reply to Shipley and Peters. David Tilman, 1283
Search theory and mate choice. II. Mutual interaction, assortative mating, and equilibrium variation in male and female fitness. Leslie A. Real, 901
The seduction by mechanism: a reply to Tilman. Bill Shipley and Robert H. Peters, 1276
Sex allocation in hermaphroditic sea basses. Christopher W. Petersen, 650
Sexual cannibalism in orb-weaving spiders: an economic model. Jonathan A. Newman and Mark A. Elgar, 1372
Sexual size dimorphism and sibling competition: implications for avian sex ratios. Hugh Drummond, Jose Luis Osorno, Roxana Torres, Cecilia García Chavelas, and Horacio Merchant Larios, 623
Spatial autocorrelation analysis as an inferential tool in population genetics.

Robert R. Sokal and Neal L. Oden, 518
Spatial autocorrelation methods in population genetics. Montgomery Slatkin and Hubert E. Arter, 499
Spatial patterns of chloroplast DNA and cone morphology within populations of a *Pinus banksiana–Pinus contorta* sympatric region. David B. Wagner, Zhong-Xu Sun, Diddahally R. Govindaraju, and Bruce P. Dancik, 156
Spatial scaling of species composition: body masses of North American land mammals. James H. Brown and Paul F. Nicoletto, 1478
Species-abundance, biomass, and resource-use distributions. Mark D. Pagel, Paul H. Harvey, and H. C. J. Godfray, 836
Sperm competition and the evolution of multiple mating. James W. Curtsinger, 93

Temperature and sex-specific differences in reproduction related to genotypic variation at the esterase-6 locus in *Drosophila melanogaster*. Douglas B. Meikle and Rollin C. Richmond, 762
"Trojan sparrows": evolutionary consequences of dishonest invasion for the badges-of-status model. Ian P. F. Owens and Ian R. Hartley, 1187

The unselected hypothesis for the evolution of helping behavior: too much or too little emphasis on natural selection? Ian Jamieson, 271

Variation in plankton densities among lakes: a case for ratio-dependent predation models. Roger Arditi, Lev R. Ginzburg, and H. Reşit Akçakaya, 1287

Why do plants produce surplus flowers? a reserve-ovary model. Johan Ehrlén, 918
Why mated songbirds sing so much: mate guarding and male announcement of mate fertility status. Anders Pape Møller, 994
